(961) 70 657 961

A highly motivated Full Stack Developer with expertise in Laravel and MERN stack. Strong experience in developing scalable multi-vendor systems, e-commerce platforms, and dynamic dashboards. Skilled in clean code practices and proficient in both front-end and back-end development. Holds a Bachelor's degree in Computer Science and professional diplomas in Full Stack Laravel and MERN Stack development.

Work Experience

Freelance Developer

Present

Self-employed

- Developed e-commerce platforms with product variants, dashboards, and analytics using Chart.js
- Built a multi-vendor system using Laravel, including detailed features like order management, customer and vendor interactions, and clean code principles
- Developed a multi-vendor platform using the MERN stack, with integrated Stripe payment, real-time chat via Socket.IO, and cloud-based media management using Cloudinary.
- Built a clinic booking system with role-based access for doctors, patients, and admins, handling time management professionally.

Full Stack Developer Intern

Mar 2023 - Jun 2023

Dmp soft | remotely

- Designed and implemented responsive dashboards
- Enhanced pre-built templates and added new functionalities.
- Managed roles, permissions, and product catalogs
- Collaborated on projects using Git and GitHub for version control

Projects

Multi-Vendor System (Laravel)

Sep 2023

- Created a multi-vendor platform with features such as vendor-specific orders, customer management, and detailed reporting, ensuring a focus on clean code and scalability.

E-commerce Platform (MERN Stack)

Mar 2024

- Developed a robust multi-vendor platform with real-time chat using Socket.IO, integrated Stripe payments, and cloud-based media management via Cloudinary. Used React and Tailwind CSS for front-end design and Redux for state management

Clinic Booking System

Jun 2024

- Built a full-stack clinic management system with features like appointment scheduling, booking verification, and role-specific functionalities for doctors, patients, and admins

Learning Management System (LMS)

Present

- Designed and implemented a comprehensive LMS platform featuring role-based permissions for administrators, instructors, and students.
- Integrated detailed course analysis and interactive charts to provide insights into student performance and course effectiveness.
- Developed support for video courses, enabling students to track progress and complete courses at their own pace.
- Ensured smooth user experience with features like course completion tracking and an intuitive dashboard for administrators to manage users and content efficiently.

Core Skills

React js, Node js, laravel, express js, redux toolkit, chart js, tailwind css, bootstrap, socket IO
